

PRO-SET Epoxies

The standard line of PRO-SET epoxies offers versatile resin/hardener combinations to accommodate a wide variety of processes. PRO-SET standard epoxies are based on the latest in formulation technology and the best raw materials available for excellent performance.

Standard epoxy systems allow you to select resin by viscosity and hardener by speed. Uniform (3:1) mix ratios allow for in-shop custom blends for maximum adaptability to your proprietary processes.

All standard PRO-SET products are formulated, manufactured in Bay City, Michigan and are competitively priced.
